# MORE SUCCESS FOR WFS IN MADRID AS AIRBRIDGECARGO AWARDS FREIGHTER HANDLING CONTRACT

**Worldwide Flight Services (WFS) has won a contract to handle AirBridgeCargo Airlines' (ABC) new freighter operations at Madrid Airport.**

WFS will provide ramp handling for AirBridgeCargo's three Boeing 747F flights a week to the Spanish capital.

WFS operates three cargo centres at Madrid Airport with over 10,500 sqm of surface space. These facilities include dedicated areas to handle all types of goods, from general cargo, courier and express shipments to temperature-sensitive perishables and pharmaceuticals, AVI and valuable products. The WFS team are trained to

handle both passenger and freighter aircraft, supported by an extensive fleet of new GSE equipment to ensure the safe and secure handling of all aircraft and cargoes.

Humberto Castro, Managing Director of WFS in Spain, said: "Freighter operations are very important to support Spain's import and export trade, especially at this time when there has been a significant loss of capacity onboard passenger flights due to COVID-19. AirBridgeCargo's new freighter services are an important boost for Spain's freight forwarding community and we will use our expertise to ensure we deliver the best experience for the airline's customers.

This is more good news for WFS in Spain as we continue our recovery from the impact of the Coronavirus on the aviation industry."

WFS provides a full portfolio of services for airlines in Madrid, managing ramp operations as well as passenger and cargo handling. In Spain in July, WFS was also awarded contracts in Madrid by Airst and in Seville by Air France and Wizz Air.
