

Dear Valued Customer,

After an accelerated start-up at the end of April, WFS had published Terminal Handling Charges based upon our limited knowledge of the market at that moment. We have in the meantime gained some experience on the workloads and specific characteristics of the local market and have therefore decided to review our Terminal Handling Costs at Liège Airport.

The change concerns our import BUP tariffs.

As from 1<sup>st</sup> of November 2020, BUP release charges will be invoiced as follows:

- Release fee of 90€ per AWB, no matter how many ULD's
- Loading fee of 50€ per ULD

We are confident these rates are better aligned with current market prices and will give you the opportunity to entrust your cargo to WFS and its clients for a smooth and rapid handling.

These new rates will be applied automatically as from 1/10/2020.

You will find our new Terminal Handling Charges attached to this mailing.

Hope to have informed you well,

Best regards,

**Ward Van Laerhoven** | Terminal manager LGG
