AIRBRIDGECARGO AIRLINES SIGNS THREE-YEAR CONTRACT AS THE LAUNCH CUSTOMER OF WFS' NEW CARGO TERMINAL AT ATLANTA AIRPORT

AirBridgeCargo Airlines (ABC), part of Volga-Dnepr Group, has signed a three-year contract to become the launch customer of Worldwide Flight Services' (WFS) new cargo terminal at Hartsfield-Jackson Atlanta International Airport (H-JAIA).

Under the terms of the agreement, WFS will handle some 9,500 tonnes of cargo annually for AirBridgeCargo, carried onboard approximately 100 Boeing 747-400ERF freighter flights. The contract extends ABC's partnership with WFS in North America, with WFS already serving handling contracts with

the Russian all-cargo airline in New York JFK, George Bush Intercontinental/Houston Airport (IAH), and Dallas/Fort Worth.

"AirBridgeCargo is an important and growing customer of WFS globally. Through multiple contracts in the U.S. and Europe, we are consistently

proving our ability to deliver the service excellence ABC demands for its customers, as well as our expertise in supporting the airline's portfolio of special cargoes services, including for pharmaceuticals and

oversized shipments. The airline and its customers are the first to benefit from WFS' investment in a new cargo terminal and handling systems in Atlanta and we are delighted to welcome them as our launch client," commented Mike Simpson, EVP Americas at WFS.

"2020 put air cargo at the forefront, showing its ability for resilience and agility. Together with reliable and trustworthy partners, such as WFS is, we are happy to contribute with high-quality services for our customers, both in the USA and beyond, especially for special cargoes, such as healthcare, high-tech and e-com. Together with WFS, we will be able to offer dedicated

Worldwide Flight Services

logistics solutions and a quality level our customers and market expect us to have. Through the capabilities of the new terminal, we will support our existing customers from various industries, as well as attract new ones," highlighted Caroline Pappas, Director of Sales, North America.

WFS opened its operation at H-JAIA on 15 May 2021 under a 20-year lease agreement with the airport authority for Atlanta's new Cargo Building C, the first new cargo terminal to open at the airport since the 1980s.

WFS' 50,000 tonnes capacity Atlanta operation provides airlines and their freight forwarding clients with world class cargo handling services, supported by WFS' commitment to the highest international safety and security standards. The new facility incorporates 11 dock doors, drive-up ramp access, and a container bypass system. Multiple charging points are also available for 'active' temperature-controlled containers and WFS is also offering services for temperature sensitive shipments.

About WFS

Founded in 1993 and headquartered in Paris, WFS (www.wfs.aero) is the world's largest air cargo handler and one of the leading providers of ground handling and technical services with annual revenues of over EUR1.3 billion. Its 22,300 employees serve more than 270 airlines at 175 major airports in 22 countries on five continents.

About AirBridgeCargo Airlines

AirBridgeCargo, a leading global cargo carrier, operates an expansive international route network which connects customers to the world's largest markets in Asia, Europe, and North America. The airline covers more than 30 major cargo gateways to accommodate international trade flows. All flights are operated via Russia to guarantee seamless connections throughout the airline's worldwide network. Air cargo is transported and handled within a 48-hour delivery time, all managed by a highly skilled and qualified ground handling task force. ABC's fleet consists of Boeing 747 and Boeing 777 freighters and is one of the most modern and youngest in the airline industry.

Operating in the market since 2004, ABC is dedicated to catering to the needs of its worldwide customers through high quality service standards. The operating advantages of ABC's freighter fleet, the performance of the airline's highly-skilled personnel, and the constant improvements of its internal processes, enable the airline to carry all types of air cargo in full compliance with global industry standards, including cargo requiring observance of special handling conditions. AirBridgeCargo is committed to consistently reviewing and developing its existing service offers to realign them with evolving market and customer expectations.
