WFS COOPERATES WITH JETPAK TO OFFER FIRST AND LAST MILE DELIVERIES FOR CARGO AND E-COMMERCE ACROSS DENMARK

Worldwide Flight Services (WFS), a SATS company, is expanding its specialised E-Commerce & Freight Forwarder Handling (EFFH) services in Denmark with the launch of a new nationwide road transport cooperation with JetPak for shipment pick-ups and deliveries.

With over 40 years' experience in air and ground transportation, JetPak provides same day, door-to-door deliveries across the Nordic region, supported by over 170 local offices. Through this collaboration, WFS is now able to offer its e-commerce, freight forwarder, and airline customers First and Last Mile transportation services across Denmark.

"This collaboration brings together two industry specialists and gives our customers combined access to WFS' air cargo handling and security screening expertise alongside JetPak's time-critical road and air logistics solutions. Through our shared commitment to service excellence, and by keeping shipments moving on-time, we are offering our customers a stronger platform for growth across Denmark," said Inge Briand de Crevecoeur, WFS' Managing Director, Denmark.

JetPak has also signed a six-year contract for dedicated warehouse capacity in WFS'

new E-Commerce & Freight Forwarder Handling (EFFH) facility, which opened in July at Copenhagen Airport.

WFS now operates over 21,500m² of facilities at Copenhagen Airport, including a temperature-controlled pharma facility as well as its dedicated EFFH building. With these investments, WFS is providing a growing choice of value-added services for freight forwarders moving import and export cargo and for the rising volume of e-commerce shipments handled through Copenhagen Airport.

WFS' EFFH services make freight Ready-for-Carriage, capturing weight and cargo measurements, and providing security screening, consolidation, and transportation to and from handling agents. The solution also covers deconsolidation, sorting, and preparing shipments for customs clearance, plus onward transportation by road, as well as shipment labelling, repacking, crating, and customised screening services.
